

Medical Report

Patient: Evan Jollofi

Date: [Date of Consultation - Needs to be added from the original transcript]

Patient History: No significant past medical history noted. Patient presented complaining of a fractured finger sustained during a basketball game. Also reported a headache.

Findings: Fractured finger (location and type of fracture not specified). Patient reported headache.

Diagnosis: Fractured finger. Headache (cause unspecified).

Recommendations: Further evaluation of the finger fracture (X-ray recommended, but not explicitly stated). Treatment of headache with over-the-counter analgesics. Follow-up appointment recommended to assess fracture healing and address persistent headache.

Medications: Ibuprofen 100mg (dosage frequency not specified).
